

SUCCESS HISTORY OF MISHTI

Mishti. Five months old. Born with clubbed foot (foot twisted out of shape). Born to Puja and Manoj Thakur of Metiabruz (earning Rs.1200 a week). 'Ab to zindagi bhai aise hi jeena hoga' was their resigned acknowledgement. Until they encountered Team GRIRR. An NGO focused on rehabilitating children in need of physiotherapy. GRIRR assured the parents that the problem was indeed correctable. GRIRR advised and oversaw Mishti being put in a plaster cast followed by relevant physiotherapy and CTEV cast. Soon Mishti will be absolutely normal. Her mother blessed the GRIRR team: 'Bhogoban tomader bhaalo rakhbe'. The remarkable thing was that the difference between hopelessness and optimism was a treatment cost of only Rs 5000. A lot can be done with little – if we care. If you should seek to find prospective cases of this kind, call Nazim at 98315 17499
