

How GRIRR  
helped  
Samawiya's  
knees  
recover

*Garden Reach Institute for  
Research and Rehabilitation*

A young girl with dark hair is sitting in a white, fluffy winter outfit, possibly a snowsuit or a large hat, while sitting in a swing. The image is overlaid with a teal color. The text is written in a white, serif font. The girl is looking slightly to the right of the camera with a thoughtful expression, her hand near her mouth.

Samawiya was  
born with bowed  
knees on account of  
calcium deficiency.

She could walk...but  
not straight.

Her family  
turned to a  
prominent  
public hospital.  
The doctors said  
'Yeh toh normal  
hain'.

The parents  
were not  
convinced. They  
turned to GRIRR  
for a second  
opinion.

GRIRR  
studied the  
case and  
concluded:  
'Curable.  
Befikar  
rahiye.'

GRIRR provided a  
corrective belt to  
straighten  
the knees.

Complemented by  
exercise sessions,  
physiotherapy and  
a calcium syrup.

Something  
amazing  
happened.  
Samawiya made  
unexpected  
progress.

She can walk  
straight, run and  
dance like all  
other children...  
no difference.

Her parents say:  
'Aisa pata hi nahi  
chal rahaa hain ki  
koi problem tha.'
